

Valentyn Korobeinikov

AI-Augmented QA Engineer

Ivano-Frankivsk, Ukraine · Remote

Email: stuartblum5@gmail.com · Telegram: [blumination](https://t.me/blumination) (prefer)

Summary

QA Engineer with 5+ years in web, desktop (Electron) and mobile testing. I build AI-augmented QA: multi-agent Claude Code pipelines that verify Jira tickets end-to-end with evidence, custom MCP servers, and AI-assisted Playwright test generation from Qase cases. Strong in API/DB testing, test design and building QA processes from scratch.

Skills

AI & Agents: Claude Code (sub-agents, skills, hooks, plugins), MCP servers (TypeScript/Python), prompt engineering

Automation: Playwright (UI, API, Electron), TypeScript, Postman/Newman, Pytest

API & Data: REST APIs, PostgreSQL/SQL, AWS SQS, RabbitMQ, Grafana, Sentry

CI/CD & Tools: GitHub Actions, Docker, Git, Qase, Jira, Confluence

Manual: Web & cross-browser (BrowserStack), Android/iOS, Electron; analytics (GTM, Segment)

Experience

QA Engineer (AI-Augmented) · *OnlyMonster* · Apr 2026 – Present

- Built a multi-agent Claude Code pipeline that takes a Jira ticket and PR to an evidence-backed QA verdict (UI, DB and log checks, Qase/Jira sync)
- Designed a risk-analysis agent that maps side effects of code changes across microservices and message queues before sign-off
- Automated Playwright test generation from Qase cases with lint/typecheck gates and auto-PRs; added detection of outdated test cases
- Made AI results verifiable: per-requirement evidence, strict JSON verdicts and checks that block unsupported PASS results
- Built MCP servers for Jira/Confluence evidence upload and read-only multi-DB access; cut screenshot token usage (≈57% of browser-agent tokens)
- Led the QA team's AI adoption: workshops, junior onboarding course, shared test-case authoring/review skills

QA Engineer · *NDA* · Oct 2025 – Apr 2026

- Functional, regression and usability testing of web apps; API testing via Postman; test suites and documentation

QA Engineer · *OFMS LTD (OnlyMonster)* · Aug 2024 – Oct 2025

- Tested Electron desktop app and APIs (Postman/Newman); built QA processes from scratch
- Interviewed QA candidates and onboarded new team members

Manual QA Engineer · *Flawless Group* · Apr 2023 – Aug 2024

- API, cross-browser (BrowserStack) and SQL data testing; basic security checks with OWASP ZAP

Manual QA Engineer · *MintyMint* · Jan 2022 – Apr 2023

- Full-cycle Android/iOS testing, API testing, analytics validation (GA, GTM) in Scrum

Manual QA Engineer · *Natife; Throne* · Mar 2021 – Jan 2022

- Cross-platform testing (Android, iOS, Smart TV) and web marketplace testing; test cases, cross-browser testing

Projects

- **claude-qa-kit** — 3 Claude Code plugins for exploratory QA, test automation and frontend/Figma audits
- **CrawlIQ** — AI website auditor: Playwright crawler, 20+ SEO/a11y/performance checks, LLM summaries, Telegram bot (Python, FastAPI) — [GitHub](#)
- **API Mock Studio** — HTTP proxy with UI to intercept, inspect and mock API responses (Node.js) — [GitHub](#)
- **Lighthouse Runner** — Electron app for repeated Lighthouse audits with averaged results and CSV export — [GitHub](#)
- **QA Interview Prep** — SQL trainer, ISTQB simulator and test design exercises (EN/UA/RU) — [Live](#)
- **Floodgate** — load testing platform on k6 and Gatling (up to 5,000 VUs)
- **Bug Reproduction Tool** — Chrome extension that records user actions as Playwright tests (Chrome Web Store)
